ABOUT ME

I am a software architect/engineer. I've mostly worked professionally with web, mobile projects, and frameworks.

I like building new stuff and work with other people – nothing really interesting is ever built alone!

Web/Mobile Development

I design & develop web or mobile apps with the following technologies/framework & Approach

Java(EE, SE), C# and .NET, Vanilla JavaScript, Android(Java),Unit Testing, SDLC, Bootstrap & Git

API Integration/Development

I Develop Application Programming Interfaces for Different Needs, Make use of or Integrate APIs

Identity API, Bills API, Google API, Payment Service API, Data & Airtime API, FinTech APIs (Remita, Okra, Mono), Recovery API, and More.

Database Management System

Design Data Architecture/Structure with the Relational and Non-Relational Tech.

SQL(Oracle, Microsoft SQL, MySQL), MongoDB

UI/UX

Design User Interface and User Experience Iteration Design for Software development using

Figma

Game Development

Write Script for Characters, Lights, Sound, Camera Tracking, Game Logic using

Unity

SKILLS

Web/Mobile Development API Development Database UI/UX Game Development
